A \$17<sup>55</sup> VALUE

ONLY \$16<sup>50</sup>

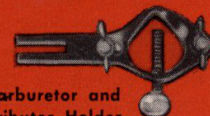

for the complete set of 5 pieces

Powrarm Jr.  
No. 343

Tee Bracket  
Extension  
No. 349

Single Carburetor and  
Distributor Holder  
No. 309

Magneto Holder No. 313

Double Carburetor  
Holder No. 311

With the Powrarm Jr. every garage and repair station can now obtain the benefits of a work Positioner at small cost. No longer is brute strength needed to move the work in and out of a vise for convenient working positions. Powrarm holds and positions work so that a mechanic can get to all sides of a carburetor, fuel pump, etc., faster, easier and leave both hands free.

The danger of injuring work and hands by slipping tools, dropping work to the floor and dropping parts is greatly minimized. Positions which are awkward and tiring are avoided in the shop equipped with a Powrarm Jr. It can be clamped or bolted to bench.

# POWRARM

POSITIONING EQUIPMENT

# TIME SAVING APPLICATIONS of the POWRARM Jr.

Single Carburetor Distributor Holder No. 309 attached to Wilton Powrarm Jr. with Tee Bracket extension No. 349. Note the ease with which a distributor can be held and how easily small parts can be removed and replaced. Adjustment can be quickly made with a substantial saving in labor costs.

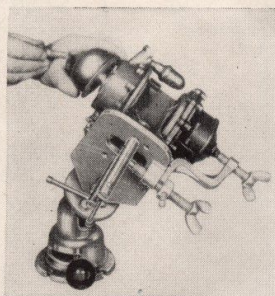

The same Single Carburetor Distributor Holder No. 309 shown on the left is here pictured holding a single barrel carburetor. Regardless of height or arm length of a mechanic, the assembly can be moved to any position desired and which will not cause undue fatigue.

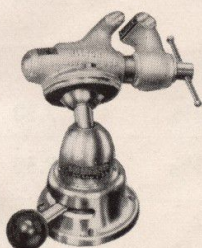

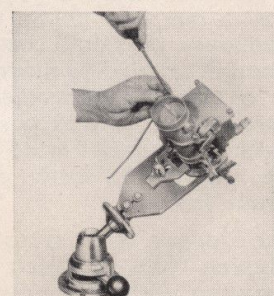

Wilton Standard Vise No. 307 attached to Wilton Powrarm Jr. by means of the Tee Bracket extension No. 349. More accurate work can be done by a mechanic using this vise because small assemblies can always be moved to working position.

Magneto Holder No. 313 attached to Powrarm Jr. by means of Tee Bracket extension No. 349. Magnetos for tractors, motorcycles, airplanes, old cars and diesel, marine and gasoline engines can be bolted to the holder — a real time saver for the busy mechanic.

Fuel Pump Holder No. 317 connected to Powrarm Jr. by means of Tee Bracket extension No. 349. Intricate parts of fuel pump are quickly accessible and easily assembled following repairs. Goose neck to compress diaphragm spring included.

Double Barrel Carburetor Attachment No. 311 bolted to Powrarm Jr. by means of Tee Bracket Extension No. 349. Repair and replacement of parts on carburetors of the double barrel type call for precision adjustments. Here the value of having an assembly in a good working position is all important.
